Available in 128GB and 64GB storage configurations² and powered by an Intel Core i5 processor, Surface Windows 8 Pro is a powerful machine. Weighing less than 2 pounds and measuring only 13.5 millimeters thin, it's the perfect way to do more.

Top Features and Benefits

- **Windows 8 Pro.** Tablet meets laptop in an intelligently constructed machine with the power and legacy of Microsoft applications and security features — all in one beautiful place.
- **Surface pen.** Surface with Windows 8 Pro includes a pen that lets you jot down ideas anytime, anywhere. Distinctively crafted to work with Surface, the pen is a stylish way to edit, collaborate and do your signature work.
- **Click in and do more.** Two ways to click in and do more — Touch Cover and Type Cover. Revolutionary design marries a light, thin form with comfort and speed. Doubling as a protective screen cover, both keyboards offer productivity with style and convenience.
- **Kickstand.** Surface was designed with an integrated Kickstand that makes work instant and easy. Just flip out the Kickstand and you're ready to get busy.
- **Security.** Surface Windows 8 Pro combines the security and manageability that you expect from Microsoft. Microsoft BitLocker encrypts your hard drive's data, helping to keep your stuff safe. Install applications and connect with accessories and printers, just like you always have.
- **Connectivity.** When your creations need to be shared with others, connect to projectors, big screens or displays by plugging into the Mini DisplayPort.³ This HD connection lets presentations, videos and documents take center stage.
